**Attention: Angelo Cairo, Project Manager**

**Reference: McMaster University – Engineering Technology Building**

Dear Angelo:

Having achieved Substantial Performance for the McMaster Engineering Technology Building, we would like to take this opportunity to express our sincere gratitude for the outstanding effort put forth by Stouffville Glass during the performance of your work on this project. The effort and level of cooperation portrayed by Stouffville Glass from the early stages through to the correction of deficiencies, has been second to none.

This project incorporated a number of challenges due to the sequential design and construction schedule. Stouffville Glass was able to meet the challenges and the many design changes were handled in a timely and efficient manner. You should be very proud of your accomplishments.

The McMaster Engineering Technology Building was a LEED Gold project and Stouffville Glass was able to comply with the stringent restrictions put in place. The efforts by all our trades to comply with the LEED requirements, is the reason we were able to achieve the construction credits required for LEED Gold status.

It has been a pleasure dealing with Stouffville Glass on this project and we trust that we will have the opportunity to work with you in the future.

Sincerely your,

BIRD CONSTRUCTION COMPANY
